

YANKAJI TO RIMIN KEBE ROAD

The Road was started by the administration of then the governor of kano Engr. Rabi'u Musa Kwankwaso, but he could not finish it up to when his time elapsed in office. The present governor budgeted almost four (4) billion Naira for the road on his second year in office, but only drainage was constructed in the past two years.

What makes the road very important is, it is the only road that links the community to the outside world, the road leads to the only primary health care centre (gwagwarwa), gwagwarwa police station which is the most strategic divisional police station in the whole LGA, and also the road is a route to the community market (Brigade Market). This is what makes the road very important to the people of the community.
